

Synchrony Transact is the new, online platform that provides an end-to-end financing solution on your digital devices—from consumer credit application to contractor payment. It makes the financing process faster, easier and more convenient for contractors and consumers, allowing you and your team to focus on projects rather than paperwork.

- **Streamlined Process:** Help customers request, use, and approve funding in moments.
- **Customized Use:** See a headquarter view, customized to your menu, and track employee IDs.
- **Digital Records:** There's no need to retain paper documents.
- **Device Agnostic:** Synchrony Transact can be accessed on a desktop computer, laptop, or tablet.

### How it works:

**Synchrony Transact makes it easy for you to help customers make the most of promotional financing.**

1

**Payment Estimator:** Review estimated monthly payments with consumers and view promotional financing options. (ability to email consumers' payment estimate scenarios)

3

**Sales Slip:** Complete transaction details, including products/services, sale amount, promotion selection, and confirm transaction with the cardholder.

2

**Apply for Credit:** Help your customer apply for credit in just a few minutes. You just need to verify two forms of ID, and capture basic contact and income information. (accommodates individual and joint applications)

4

**Manage Transactions:** Manage your sales pipeline, including re-sending Sales Slips, initiating Completion Consent (if required), and submitting transactions for funding.
